Tangerang

Full-Stack Web Developer & Systems Business Analyst experienced in translating user requirements into structured business processes, system workflows, and scalable web applications. Skilled in requirements analysis, business process modeling, ERD design, database architecture, and end-to-end system development using React.js, Next.js, Laravel, Express.js, and PostgreSQL. Adept at bridging business needs and technical solutions to improve operational efficiency and deliver user-oriented systems.

Pengalaman Kerja

Biro Teknologi Informasi - Universitas Mercu Buana - Jakarta Barat — Feb 2025 - Oct 2026

Fullstack Developer Intern

- UMB Internship Recruitment System: Analyzed user requirements and translated business needs into end-to-end recruitment workflows, system logic, and database structures, developing a full-stack application that handled 100+ student applications and optimized query performance.
- Business Intelligence Dashboard: Developed 20+ RESTful API endpoints to support data integration and reporting, improving data reporting speed and processing efficiency by 30%.
- Pusat Unggulan Ilmu Pengetahuan & Teknologi (PUI) System: Gathered and analyzed user requirements, designed the initial Entity Relationship Diagram (ERD), and collaborated with a 2-member team to develop the system from initial design through completion.
- BTI Management System: Analyzed operational requirements and mapped end-to-end business processes from scratch, translating them into system workflows, database models (ERD), and system architecture to streamline internal operations.
- Event Management System: Analyzed event management requirements and modeled business processes, workflows, and system logic to support cross-departmental coordination and the management of 10+ institutional events.
- Institutional Financial Support System (IFSS): Maintained and optimized the existing system by resolving 15+ technical bugs and improving application stability to support accurate financial data processing.
- Partnership System (SIKERMA): Maintained system stability and resolved bugs across 10+ active partnership modules.
- Universitas Mercu Buana Library System (OLS): Developed and enhanced 5+ core features to improve system functionality and user experience.

Sinergi8Consulting - Jakarta — Jan 2026 - Mar 2026

Frontend Developer Freelance

- Designed and developed 1 custom WordPress company profile for Sinergi 8 Consulting, optimizing performance to achieve fast loading times and a highly responsive user experience.
